Jacint Verdaguer was a priest and also one of the most important Catalan writers of the Catalan Renaissance (*Renaixença*). He was born into a modest – but not uneducated – family in Folgueroles in 1845. From a young age he discovered his interest in popular traditions and during his time at the seminary in Vic he received an ecclesiastical education and became familiar with rhetoric and the classics while also writing poetry. His works include the romantic epic poems *l'Atlàntida* and *Canigó*, as well as the poetry collections *Idil·lis i cants místics*, *Pàtria*, *Montserrat*, *Flors de calvari* and *Aires del Montseny*. Other published works include *Excursions i viatges*,

Dietari d'un pelegrí a Terra Santa, a collection of popular songs and a series of articles published in the press.

This is one of the routes he took to write *Canigó*, a Pyrenean legend from the times of the Spanish Reconquista. It deals with the Pyrenees mountains, studying their geography, history, folklore and legends. Hence, *Canigó* has become one of the masterpieces of Catalan literature. The road is closed starting at the first station building. You will need to find out the timetables. However, you can go up on the Gondola.
